PROFESSIONAL SUMMARY

Results-driven **Java Full-Stack Engineer** with **3+ years** of Java 17 experience designing and delivering scalable, high-availability, cloud-native enterprise applications using **Spring Boot 3.x**, Hibernate, and RESTful web services. Expert in **microservices architecture**, OOP, design patterns (Singleton, Factory, Builder), and distributed systems on **AWS**. Agile/Scrum practitioner with strong CI/CD and TDD discipline. Recognised for AI excellence — certified across AWS, Databricks, GitHub Copilot, and Anthropic Claude. Impact: **25% query performance gain** · **15% AWS cost reduction** · **30% faster deployments**.

WORK EXPERIENCE

Cognizant Technology Solutions

Sep 2023 – Present

Associate – Full-Stack Engineer | Kolkata, India

Client: NextEra Energy (Florida Power & Light), USA – Energy & Utilities Domain

- Architected enterprise-scale **RESTful web services** and **microservices** using **Java 17**, **Spring Boot 3.x**, OOP principles, and design patterns (Factory, Builder) for high-volume energy data processing in an Agile/Scrum delivery model.
- Designed **event-driven data pipeline** using **AWS S3, SNS, SQS**, and ECS — automating ingestion, transformation, and orchestration of distributed workloads with fault tolerance and high availability.
- Engineered **Apache Spark** batch jobs processing **8,300+ files/day** (35 columns x 1,440 records) with full end-to-end completion in **under 75 minutes**, ensuring scalability across distributed systems.
- Optimised **Hibernate/JPA** ORM with indexing, query tuning, and connection pooling; persisted aggregated results to **Amazon RDS** — achieving **25% improvement in query performance**.
- Reduced **AWS infrastructure costs by 15%** through cloud resource right-sizing, schema optimisation, and pipeline efficiency improvements.

Cognizant Technology Solutions

Feb 2023 – Aug 2023

Java Full-Stack Engineer Trainee | Pune, India

- Built **Spring Boot 3.x** microservices with **RESTful APIs** following MVC and SOLID design principles; documented with **Swagger/OpenAPI**; integrated **Angular** TypeScript frontend.
- Automated **CI/CD pipelines** with Jenkins and GitHub Actions; wrote **JUnit 5** and **Mockito** unit tests following **TDD** — reducing deployment time by **30%**.

TECHNICAL SKILLS

Languages & Core Java: Java 17, Python, JavaScript, SQL | OOP, Design Patterns (Singleton, Factory, Builder), Multithreading, Collections Framework, SDLC

Backend Frameworks: Spring Boot 3.x, Spring MVC, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, Microservices Architecture, RESTful Web Services, JWT, OAuth 2.0, Swagger/OpenAPI

Frontend: Angular, TypeScript, HTML5, CSS3, Bootstrap

Cloud & DevOps: AWS (EC2, ECS, RDS, S3, SNS, SQS, Cognito, Lambda) | Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines, Maven, Git

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis | Apache Kafka, Apache Spark, Event-Driven Architecture, Message Queues

Testing & Quality: JUnit 5, Mockito, Test-Driven Development (TDD), SonarQube, Agile/Scrum, Code Review

AI & Emerging Tech: Generative AI APIs, LLM Integration, Agentic AI, Prompt Engineering, GitHub Copilot

PROJECTS

URL Shortener Platform | Java 17, Spring Boot 3.x, Spring Security, JPA/Hibernate, PostgreSQL, Maven

- Built production-grade **RESTful API** using **Spring Boot 3.x** with MVC layered architecture; applied SOLID principles and Factory design pattern for extensible URL encoding strategy.
- Implemented **JWT + OAuth 2.0** authentication and RBAC via **Spring Security**; **Swagger/OpenAPI** documented; query optimisation achieved **sub-50ms** API response time.

AI-Based Calorie Tracker | Java, Spring Boot, MongoDB, Angular, Generative AI APIs, Docker

- Developed full-stack application integrating **Generative AI / LLM APIs** for automated food detection and real-time calorie estimation with **90%+ detection accuracy**.
- Exposed **RESTful microservices** backend via Spring Boot with **MongoDB**; implemented event-driven updates for live calorie dashboard.

JVM Internals & Microservices Architecture Patterns | Java 17, Spring Cloud, System Design, Distributed Systems

- Implemented production-grade **microservices patterns** — API Gateway, Circuit Breaker, Saga orchestration, and Retry/Resilience strategies using **Spring Cloud**.

CERTIFICATIONS & ACHIEVEMENTS

Cognizant Award — "Raising the Bar" — AI Excellence & Continuous Learning (Jul 2026): Manager-nominated for Databricks GenAI, Claude Architect Foundation & Agentic AI certs; recognised for proactive upskilling and delivering impactful AI solutions.

AWS Cloud Practitioner · AWS AI Practitioner · Databricks GenAI Associate · GitHub Copilot Certified · Claude Certified Architect Foundation

Java Full Stack Cert. (Cognizant) · SQL Cert. (Great Learning) · LeetCode 4-Star (800+ Solved) · GFG Rank 3 (2000+) · Cognizant: "Doing the Right Things"

EDUCATION B.Tech (CSE) — Academy of Technology, Kolkata — CGPA: 9.54 / 10.0 **Class XII** — Gyan Bharti Residential Complex — 87.25%
